

CONTOOCOOK VALLEY RADIO CLUB
EXECUTIVE BOARD MEETING
7/28/15

1. The new repeater antenna should arrive within the week.
2. The CARS group (the 146.94 repeater) recently installed a new Diamond V2000 Antenna on Plasawa Hill in Concord. They are soon to be looking for donations for the electric bill or other maintenance needs via a "You Fund Me" or other process.
3. Frank, N1FDR, talked to KC1ECH, Aaron Olson, who is a licensed tower climber and he indicated he is willing to install our new antenna at Pat's Peak, when appropriate.
4. The operators of Pats Peak indicated that they will open the gate to the road leading to the top, so we can drive up for facilitating the install of the antenna.
5. The meeting adjourned at 9:00 pm.

(NOTE: The above minutes were taken by Mickie Clement in the absence of Steve Jones, who was out of state. Thanks to Mickie.)

Submitted,

Steve Jones, Secretary, N1JHJ
