

Contoocook Valley Radio Club
Monthly Business Meeting Notes
23 February 2010

Meeting was held at Lee Scott's home as was started at 1900 hrs followed by introductions.

Treasury Balance: \$5,173.92

John Lind spoke about the list of items the club has for sale. Skip, K1SPG, offered to craft an email to be sent via the reflector so that everyone could have an advance list before the Ham Fest.

Jim has several boxes of technical books.

John Moore made a motion to close the meeting, seconded by Jim Miller. Motion carried.

The Planetarium needs logbooks and to design their SQL Card. The Portsmouth Club is setting up their antenna. Once setup, someone needs to instruct the planetarium people on how to use the station. It was suggested a Plexiglas shroud be made for the station, which limits access to the radio, especially when no one is around.

Lindsay Collins, K1JY, gave an extensive presentation on the current status of the club repeater. The power supply is probably OK, but should be replaced. The duplexers are old, but are in good shape. And the current duplexers are most likely are better than new ones. Discussion continued about the controller. Duplexers are very expensive. Lee Scott, AA1YN, will look into pricing from his employer.

The repeater is more sensitive and seems to have better coverage than before.

Motion made by Jim to adjourn the meeting. The motion was seconded by Skip, K1SPG, and was voted and passed.
